

DMSMS & PARTS MANAGEMENT CONFERENCE

FORMERLY KNOWN AS PMMC - PARTS & MATERIAL MANAGEMENT CONFERENCE

2025

ATTENDEE & EXHIBITOR **PROSPECTUS**

An ARCTOS Hosted Event

OUR MISSION

DMSMS & Parts Management Conference (DPMC) Is your program having problems with DMSMS and obsolescence? Are the problems getting worse? Do you have questions about intellectual property rights, additive manufacturing, cyber security, and counterfeit prevention? Do you want to meet DMSMS and parts management experts who can help improve your situation?

Right now is a time of important and positive changes for the DoD DMSMS and parts management communities. In the closing months of 2020, DoDI 4245.15, DoD DMSMS Management was published. This is the first DoD DMSMS instruction in more than 40 years! In addition, DoDI 5000.88, Engineering of Defense Systems which includes a requirement to implement parts management processes was also published.

The 2025 DMSMS & Parts Management Conference provides you with new information to successfully meet these new requirements, shows what is happening in the DMSMS community, and addresses your questions. You will have opportunities to interact and exchange ideas with specialists from government, industry, and academia, express your views and ideas on improving DMSMS and parts management, and meet with technical experts. You will experience state of the art technologies that can be applied to parts and material management at the training sessions and the exhibit hall.
